- 19” profiles marked with U height position
- Large cable entries in base and roof
- Roof is prepared for fan units

PRODUCT OVERVIEW

D-Data Center series are designed to provide maximum performance with a professional technical, aesthetic look and super passive ventilation for data center infrastructure and are available in range of heights and depths.

Enhanced strength, super passive ventilation and aesthetics are priorities of D-Data Center’s design. Each cabinet has a ventilated roof for better air circulation and roof cable management panels. Fully adjustable front and rear profile rails and large cable entries of the cabinet, make this product extremely attractive to installers who needs Data Center cabinet.

Each rack consists of up to 1.5 mm strong steel sheet material which ensures a very good stability as a robust steel construction due to special plate curving technique and a load capacity up to 1500kg can be reached. Sliding balance bars with leveling feet in front provides better stability based on center of gravity. An extensive accessories portfolio for plinths, shelves, cable management, etc. will help to meet many requirements in daily use.
